

STIHL[®]

Why Buy STIHL OILOMATIC[®] Saw Chain?

STIHL has the right saw chain for every application and most brands of chain saw.

STIHL is the only chain saw manufacturer worldwide that designs and manufactures its own chains. You can be assured the same quality engineering and innovative technology that have made our chain saws famous goes into every component of long-life STIHL OILOMATIC® saw chain.

Prestretched Chain

- Prestretched before leaving the factory
- Helps eliminate excessive chain stretching during break in period
- Reduces maintenance time and component wear

Chamfered Rivet Holes

- Special machining process ensures smooth rivet holes with no microscopic cracks
- Reduces friction and stretching

OILOMATIC® Drive Link

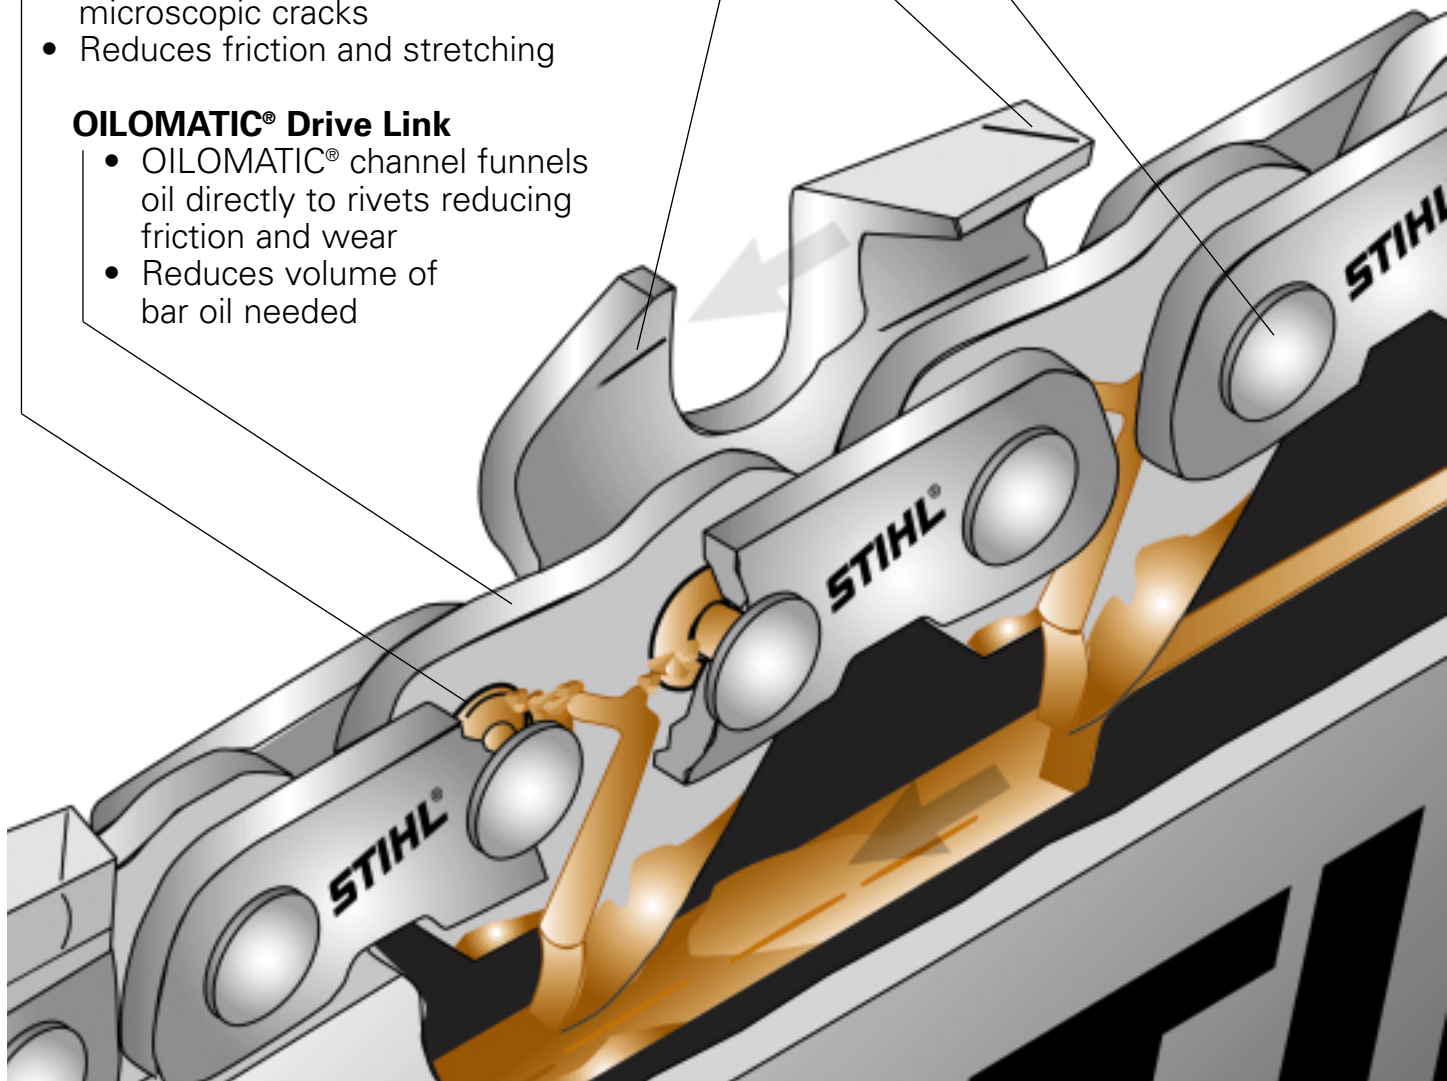

- OILOMATIC® channel funnels oil directly to rivets reducing friction and wear
- Reduces volume of bar oil needed

Chromed Cutters

- Sharpened before assembly
- Stays sharp longer with less filing
- Filing angle indicator mark on depth gauge
- Laser engraved filing angle on cutters

Hardened Rivets

- Enables rivets to withstand high loads

Important: STIHL recommends the use of STIHL green labeled low kickback saw chain and reduced kickback guide bars for all chain saw powerheads. Read and follow all warnings and instructions that are included with STIHL chain saws, saw chain, and guide bars.
